Profile & Skills

- Ambitious and eager developer with a keen aptitude for new languages and concepts
- Flexible and independent with experience in a variety of company sizes and development styles
- Team player with strong interpersonal skills who is easy and fun to work with
- Naturally creative and inquisitive communicator proficient with relational databases
- Knowledgeable about a wide range of Object Oriented programming languages including Java, Python, and C, as well as shell scripting, working with Linux at the command line, and Android development through Android Studio

Education

Dalhousie University, Halifax, NS – Bachelor of Computer Science Degree, 2014-2019

Greenwood College School, Toronto, ON – Ontario Secondary School Diploma, 2010-2014

Experience

Sales Associate, Jasper Skytram, Jasper, AB — June - November 2019

- Provided information to guests from around the world about the Jasper area including surrounding mountain ranges and local wildlife
- Learned valuable skills regarding helping customers who do not speak English, often being required to work for long periods of time if the tramway was stalled
- Worked with a small team serving hundreds and sometimes thousands of guests per day, strong interpersonal skills were a necessity

Junior Software Developer, Solutioninc Ltd, Halifax, NS — January - May 2018

- Wrote Python scripts that would automatically generate reports and shell scripts that would concatenate them daily and send them to internal stakeholders
- Wrote JavaScript for their Flex product, allowing Wi-fi boxes to set themselves up from a remote location
- Learned about team-based development while collaborating with senior developers and data analysts, gaining experience in the day-to-day operations of a smaller tech company (~30 employees)

Quality Assurance Intern, Ceridian, Toronto, ON — June - August 2016

- Worked as part of a test-driven team of 20, using basic SQL queries to locate information in their customer database
- Diagnosed issues with their DayForce program and reported them to developers
- Learned about the software development cycle/agile development at a large sized company (~4500 employees)
